### Empathy Map Canvas:

In the Empathize & Discover phase, the team analysed how students, faculty, and administrators manage academic and administrative tasks manually. They found delays, miscommunication, and errors caused by paper-based forms and email-based processes. Students face slow approvals, faculty struggle with attendance and record accuracy, and administrators lack centralized visibility.

These findings emphasized the need for a **ServiceNow-based platform** to automate workflows, improve communication, and provide real-time data access. The insights guided the team to design an integrated solution that enhances efficiency, transparency, and user satisfaction.
